NASA Marshall Space Flight Center Official Visitor Information Center • Home of SPACE CAMP® & AVIATION CHALLENGE®

March 11, 2016

To Whom It May Concern:

Space Camp® fully endorses the efforts of our Ambassador Krit Kunplin and the Discovery of Thailand's Astronaut Project to change students' futures by helping promote our education program.

As an Official NASA Visitor Center, the U.S. Space & Rocket Center® and its educational program, Space Camp, provide a unique education for students ages 9-18, combining real space hardware, standards-correlated curriculum and authentic simulators with leadership and teambuilding training to ignite our trainees' passion for STEM learning. In a survey of our alumni, 88% reported taking an additional STEM class after attending a Space Camp program, and 66% reported that Space Camp inspired them to take up a STEM-based career or course of study.

Inspired by the vision of the legendary rocket scientist Dr. Wernher von Braun, leader of the team who put a man on the moon, Space Camp has trained the next generation of explorers, engineers, scientists, educators and leaders since 1982. Through an intense weeklong program of technology and science-based immersive simulations and the chance to work with trainees from around the globe, Space Camp offers an adventure that has launched the dreams of more than 700,000 alumni – including five astronauts!

Please let us know if there is any other information you need regarding Space Camp and its curriculum. Information on Mr. Kunplin and other partners can be found at www.spacecamp.com/partners. We look forward to welcoming Discovery of Thailand's Astronaut Project students this summer.

Best regards,

Dr. Deborah Barnhart
Chief Executive Officer & Executive Director
